

# Highly efficient moist cleaning with flock card:

**1.**

## The cleaning agent dissolves the dirt.

The flock fibers soaked with cleaning agent dissolve the dirt on the descending chip reader contacts (landing contacts).

**2.**

## Brush effect removes the dirt.

The flock fibers develop their brush effect and remove the dirt from the surface of the chip reader contacts – without damaging (scratching) them.

**3.**

## Flock fibers absorb the dirt sustainably.

The dirt particles remain adhere in the fine flock fibers and will be removed residue free with the withdrawal of the the flock card.

## Advantages of the Elix Clean Flock cards:

- Through the single use of the 4 flockpads on the cleaning card, no dirt can be set on the card and the contacts can not be damaged.
- With our special cleaning solution, the wet cleaning is highly efficient and gently removes the dirt.
- The flock coating can absorb the dirt excellent.
- No electrostatic charging can result through the wet cleaning.
- The specially developed liquid, which is mainly used in the aviation sector, is non-flammable, does not attack plastics and is still highly efficient. Also the transportation by air can be handled easily.
